Introduction to Unified Functional Testing (UFT) v 12.5

Course Overview

This course provides a comprehensive understanding of how to use Unified Functional Testing (UFT) version 12.5 as an automated functional testing tool, as is designed for manual testers who need to understand how to create basic automated tests.

Course materials focus on the UFT Keyword View to record and playback tests and make enhancements by adding appropriate checkpoints and parameters. Emphasis is placed on test modularization to improve reusability.

Participants receive instruction on how UFT identifies test objects, how to use and manage the Object Repository, how to use the Object Spy, and how to configure various UFT options.

All topics are supported by hands-on exercises based on real-life examples.

COURSE OBJECTIVE

The course objective is to teach testers how to write automated tests.

PREREQUISITES

- Basic concepts of Quality Assurance (QA)
- Working knowledge of Windows software

TECHNICAL PREREQUISITES

- Internet access

Government
Solutions

INTENDED AUDIENCE

- New Automation Testers
- Business Analysts
- QA Project Leads

DURATION:

2 Days.

COURSE OUTLINE

Topics

- ✓ Introduction to Automation Testing
- ✓ The UFT Interface
- ✓ Understanding UFT Add-ins
- ✓ Record and Replay
- ✓ Modular Tests
- ✓ UFT Objects
- ✓ Built-in Checkpoints
- ✓ Parameters
- ✓ Fixing Run Errors
